

## CHAPTER 4

### Accounting for Partnership Firms : Admission of a partner

#### Meaning:

When a new partner is admitted in a running business due to the requirement of more capital or may be to take advantage of the experience and competence of the newly admitted partner or any other reason, it is called admission of a partner in partnership firm.

According to section 31(1) of Indian partnership Act, 1932, “A new partner can be admitted only with the consent of all the existing partners.”

At the time of admission of a new partner, following adjustments are required:

1. Calculation of new profit sharing ratio and sacrificing ratio.
2. Accounting treatment of Goodwill.
3. Accounting treatment of accumulated profit.
4. Accounting treatment of revaluation of assets and reassessment of liabilities.
5. Adjustment of capital in new profit sharing ratio.

1. Calculation of new profit sharing ratio.

Following types of problems may arise for the calculation of new profit sharing ratio.

#### Case (i) When old ratio is given and share of new partner is given.

Illustration 1. (When new partner acquires his share from all partners in their old ratio)

A and B are partners in a firm sharing profits and losses in the ratio 1:2. They admitted C into the partnership and

decided to give him 1/3rd share of the future profits. Find the new ratio of the partners. (CBSE 2003)

Solution

- (i) Calculation of Sacrifice Share:

$$A's \text{ sacrifice} = 1/3 \text{ of } 1/3 = 1/9$$

$$B's \text{ sacrifice} = 2/3 \text{ of } 1/3 = 2/9$$

$$\text{Sacrificing Ratio} = 1/9 : 2/9 = 1:2$$

which is equal to old ratio

- (ii) Calculation of New Profit sharing Ratio:

$$\text{New share} = \text{Old share} - \text{Sacrifice share}$$

$$A's \text{ new share} = 1/3 - 1/9 = 3/9 - 1/9 = 2/9$$

$$B's \text{ new share} = 2/3 - 2/9 = 6/9 - 2/9 = 4/9$$

$$C's \text{ new share} = 1/9 + 2/9 = 3/9$$

New ratio among A, B and C:  $2/9 : 4/9 : 3/9 = 2:4:3$  respectively

**Note:** Unless agreed otherwise, it is presumed that the new partner acquires his share in profits

# QB365 - Question Bank Software

from the old partners in their old profit sharing ratio.

Alternative Method :

Old Ratio = A:B  
1:2

Let the profit of the firm = 1

C's share (New Partner) =  $1/3$

Remaining Profit =  $1 - 1/3 = 2/3$

Now this profit  $2/3$  will be divided

between the old partners in their old ratio i.e., 1:2

A's new Profit =  $1/3$  of  $2/3 = 1/3 \times 2/3 = 2/9$

B's new Profit =  $2/3$  of  $2/3 = 2/3 \times 2/3 = 4/9$

C's profit =  $1/3$  or  $1/3 \times 3/3 = 3/9$

Hence the new ratio = 2:4:3

Note- In this case only New Partner's share is given then

Sacrificing Ratio = Old Ratio

= 1:2

There is no need to calculate it

**Case (ii) When new partner acquires his/her share from all partners in agreed share.**

Illustration 2. (When new partner acquires his share from all partners in agreed share)

L and M are partners in a firm sharing profits and losses in the ratio of 7: 3. They admitted N for  $3/7$ th share, which he takes  $2/7$ th from L and  $1/7$  from M. Calculate the new profit sharing ratio. (CBSE 1999 Compt., 2001, 2003)

Solution.

- (i) As sacrifice share of old partners are given in the question itself, hence there is no need to calculate it.
- (ii) Calculation of New profit sharing ratio:

New share = old share - sacrifice share

L's new share =  $7/10 - 2/7 = 49 - 20/70 = 29/70$

M's new share =  $3/10 - 1/7 = 21 - 10/70 = 11/70$

N's new share =  $2/7 + 1/7 = 3/7$  (given)

New ratio among L, M and N =  $29/70 : 11/70 : 3/7 = 29 : 11 : 30/70 = 29 : 11 : 30$

**Case (iii) When new partner acquires his/her share from all partners in certain ratio.**

Illustration 3.

X and Y are partners in a firm sharing profit and losses in the ratio of 3:2. Z is admitted as partner in the firm for  $1/6$ th share in profits. Z acquires his share from X and Y in the ratio of 2:1. Calculate new profit sharing ratio of partners.

(CBSE 2003)

Solution.

- (i) Calculation of Sacrifice share:  
Given sacrificing Ratio = X:Y = 2:1,

# QB365 - Question Bank Software

therefore :

$$X\text{'s sacrifice} = 2/3 \text{ of } 1/6 = 2/18$$

$$Y\text{'s sacrifice} = 1/3 \text{ of } 1/6 = 1/18$$

(ii) Calculation of New Profit Sharing Ratio:

$$\text{New share} = \text{Old share} - \text{Sacrifice share}$$

$$X\text{'s new share} = 3/5 - 2/18 = 54 - 10/90 = 44/90$$

$$Y\text{'s new share} = 2/5 - 1/18 = 36 - 5/90 = 31/90$$

$$Z\text{'s new share} = 2/18 + 1/18 = 3/18 \text{ or } 1/6 \text{ (Given)}$$

$$\text{New ratio among X, Y and Z} = 44/90 : 31/90 : 1/6 = 44 : 31 : 15/90 = 44 : 31 : 15$$

**Case (iv) When new partner acquires his share from all partners as a fraction of their share.**

Illustration 4. (When new partner acquires his share from all partners as a fraction of their share)

A and B are partners in a firm sharing profit and losses in the ratio of 5:3. A surrenders  $1/5$ th of his share, whereas B surrenders  $1/3$  of his share in favour of C, a new partner. Calculate the new profit sharing ratio

(CBSE 2003, AI 2004)

Solution.

(i) Calculation of sacrifice share

$$A \text{ sacrifices } 1/5 \text{th of his share i.e., } 1/5 \text{ of } 5/8 = 5/40 \text{ or } 1/8$$

$$B \text{ sacrifices } 1/3 \text{th of his share i.e., } 1/3 \text{ of } 3/8 = 3/24 \text{ or } 1/8$$

(ii) Calculation of New profit sharing Ratio :

$$\text{New share} = \text{Old share} - \text{sacrifice share}$$

$$A\text{'s new share} = 5/8 - 1/8 = 4/8$$

$$B\text{'s new share} = 3/8 - 1/8 = 2/8$$

$$C\text{'s new share} = 1/8 + 1/8 = 2/8$$

$$\text{New ratio among A, B and C} = 4/8 : 2/8 : 2/8 = 4 : 2 : 2/8 = 2 : 1 : 1$$

**Case (v) When new partner does not acquire his/her share from all partners**

Illustration 5. (when new partner does not acquire his share from all partners)

A, B and C are partners sharing profits in the ratio of 3:2:1. They admit D for  $1/6$  share. C would retain his old share. Calculate new ratio of all partners.

(CBSE 2002 Compt.)

Solution.

(i) Calculation of sacrifice share : (Only A and B will sacrifice in ratio of 3:2)

$$A\text{'s sacrifice} = 3/5 \text{ of } 1/6 = 3/30 \text{ or } 1/10$$

$$B\text{'s sacrifice} = 2/5 \text{ of } 1/6 = 2/30 \text{ or } 1/15$$

$$C\text{'s sacrifice} = 0$$

(ii) Calculation of new profit sharing ratio :

$$\text{New share} = \text{Old share} - \text{Sacrifice share}$$

$$A\text{'s new share} = 3/6 - 1/10 = 30 - 6/60 = 24/60$$

$$B\text{'s new share} = 2/6 - 1/15 = 30 - 6/90 = 24/90$$

$$C\text{'s new share} = 1/6 - 0 = 1/6$$

$$D\text{'s new share} = 1/10 + 1/15 = 3 + 2/30 = 5/30 = 1/6$$

$$\text{New ratio among A, B, C and D}$$

# QB365 - Question Bank Software

$$24/60:24/90:1/6:1/6 = 72:48:30:30/180 = 12:8:5:5$$

## Case (vi) When more than one partner is admitted.

Illustration 6. (when more than one partner is admitted simultaneously)

X and Y are partners sharing profits in the ratio of 3:2. They admit P and Q as new partners. X surrendered  $\frac{1}{3}$  of his share in favour of P and Y surrendered  $\frac{1}{4}$  of his share in favour of Q. Calculate the new profit sharing ratio of X, Y, P and Q.

(CBSE 2002 Compt.)

Solution.

(i) Calculation of sacrifice share : (only A and B will sacrifice in the ratio 3:2)

X surrenders  $\frac{1}{3}$  of his share in favour of P =  $\frac{1}{3}$  of  $\frac{5}{3} = \frac{3}{15}$  or  $\frac{1}{5}$

Y surrenders  $\frac{1}{4}$  of his share in favour of Q =  $\frac{1}{4}$  of  $\frac{2}{5} = \frac{2}{20}$  or  $\frac{1}{10}$

## 2. Accounting Treatment of Goodwill.

At the time of admission of a partner, treatment of Goodwill is necessary to compensate the old partners for their sacrifice. The incoming partner must compensate the existing partners because he is going to acquire the right to share future profits and this share is sacrificed by old partners. If goodwill (Premium) is paid to old partners privately or outside the business by the new partner then no entry is required in the books of the firm.

There may be different situations about the treatment of goodwill at the time of the admission of the new partner :

### (i) Goodwill (premium) brought in by the new partner in cash and retained in the business

Illustration 7. (All partners sacrifice)

A and B are partners sharing profits and losses in the ratio of 3:2. They admit C into partnership for  $\frac{1}{4}$  share in profits. C brings ₹ 3,00,000 as capital and ₹ 1,00,000 as goodwill. New profit sharing ratio of the partners shall be 3:3:2. Pass necessary Journal entries. (CBSE 2003)

# QB365 - Question Bank Software

A and B are partners in a firm sharing profits and losses in the ratio of 3:2. A new partner C is admitted. A surrenders  $\frac{1}{5}$  of his share and B  $\frac{2}{5}$  of his share in favour of C. For purpose of C's admission, goodwill of the firm is valued at ₹ 75,000 and C brings his share of goodwill in cash which is retained in the firm's books. Journalise the above transactions.

B's sacrifice,  $\frac{2}{5}$  of his share =  $\frac{2}{5}$  of  $\frac{2}{5}$  =  $\frac{4}{25}$

Sacrificing ratio between A and B i.e.,  $\frac{3}{25}:\frac{4}{25}$  = 3:4

(ii) Calculation of C's share of profit :

C's share of profit =  $\frac{3}{25} + \frac{4}{25}$  =  $\frac{7}{25}$

(iii) Calculation of C's share of goodwill :

$75,000 \times \frac{7}{25} = 21,000$

**Treatment of Existing Goodwill shown in the books**

If goodwill already shown in the balance sheet, it should be written off by debiting old partners in their old profit sharing ratio.

Illustration 9. (Existing goodwill to be written off)

A and B are partners in a firm sharing profits and losses in the ratio of 3:2. They admit C into partnership for  $\frac{1}{5}$  share. C brings ₹30,000 as capital and ₹10,000 as goodwill. At the time of admission of C, goodwill appears in the balance sheet of A and B at ₹ 3,000. New profit sharing ratio of partners shall be 5:3:2. Pass necessary entries.

and for his share of goodwill :

Land ₹ 90,000, machinery ₹ 70,000, stock ₹ 60,000 and debtors ₹ 40,000. On the date of admission of Deepak, the goodwill of the firm was valued at ₹ 5,20,000, which is not appear in the books. Record necessary journal entries in the books of the firm. Show your calculations clearly.

Case (iv) when the new partner is unable to bring his share of goodwill in cash

# QB365 - Question Bank Software

Sometimes the new partner does not bring his share of goodwill in cash. Then his share of goodwill is calculated and adjusted by the following Journal entry.

Working Note :

(1) As nothing is given about sacrifice etc. except the old ratio and the new partners share of profit

Sacrificing Ratio = Old Ratio = 2:1

(2) Goodwill of the firm = Rs.36,000

Geeta's share of profit = 1/4

Geeta's share of Goodwill = Rs.36,000x1/4 = Rs.9,000

### Case (v) Partly goodwill brought in by new partner :

Sheetal and Raman share profits equally. They admit Chinki into partnership.

Chinki pays only ₹ 1,000 for premium out of his share of premium of ₹ 1,800

Ashok =  $7/10 - 2/5 = 7-4/10 = 3/10$  sacrifice

Ravi =  $3/10 - 2/5 = 3-4/10 = (-1/10)$  gain

Being negative result, it shows gain. Since Ravi is gaining equal to 1/10 in the profits, therefore, he will also compensate Ashok proportionately. For 1/5 share Chander brought ₹ 24,000, therefore, Ravi will compensate Ashok by ₹ 12,000 i.e.,  $24,000 \times 5/1 \times 1/10$ .

### Case (vii) Hidden Goodwill

Illustration 14.

A and B are partners with capitals of ₹ 26,000 and ₹ 22,000 respectively. They admit C as partner with 1/4th share in the profits of the firm. C brings ₹ 26,000 as his share of capital. Give journal entry to record goodwill on C's admission.

**Notes :**(1) Calculation of C's share of goodwill :

Total capital of new firm on basis of C's capital i.e., 26,000 x 4/1	1,04,000
Total capital of A and B and C i.e., ₹26,000 + ₹22,000 + ₹26,000	(74,000)
Goodwill of the firm	30,000
Thus C's share of goodwill = 30,000 x 1/4 =	₹7,500

(2) In the absence of information, profits will be shared equally.

### 3. Accounting treatment of Accumulated Profits.

Accumulated profits and reserves are distributed to partners in their old profit sharing ratio.

If old partners are not interested to distribute, these accumulated profits are adjusted in the same manner

as goodwill and the following adjusting entry will be passed.

New Partner's capital A/c Dr. (New share)

To old partners' capital A/c (Sacrificing ratio)

### 4. Accounting treatment for revaluation of assets and re-assessment of liabilities :

The assets and liabilities are generally revalued at the time of admission of a new partner. Revaluation Account is prepared for this purpose in the same way as in case of change in profit sharing ratio. This account is debited with all losses and credited with all gains. Balance of Revaluation Account is transferred to old partners in their old ratio.

- Value of stock to be increased by ₹ 2,500.
- The liability of workmen's compensation fund was determined to be ₹ 12,000.

D	31,882		
		2,55,056	3,08,096

Notes : Calculation of New Profit Sharing Ratio :

1. Share given to D =  $1/8$ , Balance of profit =  $1 - 1/8 = 7/8$ . Hence,

$$A's \text{ Share} = 7/8 \times 6/14 = 42/112$$

$$B's \text{ Share} = 7/8 \times 5/14 = 35/112$$

$$C's \text{ Share} = 7/8 \times 3/14 = 21/112$$

A                      B                      C                      D

New Ratio :  $42/112 : 35/112 : 21/112 : 1/8 = 42 : 35 : 21 : 14/112$  or  $6 : 5 : 3 : 2$ .

2. Calculation of new capital of A, B, and C based on D's Capital for  $1/8$  share is ₹ 31,882. Thus

Capital of whole firm =  $31,882 \times 8/1 = ₹ 2,55,056$ . Therefore

$$A's \text{ Capital} = 2,55,056 \times 6/16 = 95,646$$

$$B's \text{ Capital} = 2,55,056 \times 5/16 = 79,705$$

$$C's \text{ Capital} = 2,55,056 \times 3/16 = 47,823$$

Illustration 19 : A and B are partners in a firm sharing profits and losses in the ratio of 3:2. Their balance sheet was as follows on 1st January, 1993 :

Liabilities	₹	Assets	₹
Sundry creditors	15,000	Plant	30,000
Capital		Patents	10,000
A      30,000		Stock	20,000
B      25,000	55,000	Debtors	18,000
General reserve	10,000	Bank	2,000
	80,000		80,000

C is admitted as a partner on the above date on the following terms :

(i) He will pay ₹ 10,000 as goodwill for one-fourth share in the profit of the firm.

(ii) The assets are to be valued as under :

Plant at 32,000; Stock at ₹ 18,000; Debtors at book figure less a provision of 5 per cent for bad debts.

(iii) It was found that the creditors included a sum of ₹ 1,400 which was not to be paid. But it was also found that there was a liability for compensation to workers amounting to ₹ 2,000.

(iv) C was to introduce ₹ 20,000 as capital and the capitals of other partners were to be adjusted in the new profit sharing ratio. For this purpose, current accounts were to be opened.

Notes : (1) Calculation of new profit sharing ration :

Share given to C = 1/4; Balance of Profit = 1 - 1/4 = 3/4

## QB365 - Question Bank Software

$$A' \text{ share} = \frac{3}{4} \times \frac{3}{5} = \frac{9}{20}$$

$$A : B : C$$

$$B' \text{ share} = \frac{3}{4} \times \frac{2}{5} = \frac{6}{20}$$

$$\frac{9}{20} : \frac{6}{20} : \frac{1}{4}$$

$$C' \text{ share (given)} = \frac{1}{4} \text{ or } \frac{9:6:5}{20} = 9:6:5$$

(2) New capital of A and B : Based on C's capital, the total capital of the firm will work out i.e.,

$$C' \text{ capital for } \frac{1}{4} \text{th share} = 20,000$$

$$\text{Thus the capital of whole firm} = 20,000 \times 4 = ₹ 80,000$$

Therefore, based on their new profit sharing ratio, the capital of A and B will be.

$$A' \text{ share of capital} = 80,000 \times \frac{9}{20} = ₹ 36,000$$

$$B' \text{ share of capital} = 80,000 \times \frac{6}{20} = ₹ 24,000$$
